

IV Pump Documentation

Sapphire IV Pumps (MCD 2025-11) add new ePCR documentation requirements as of 10/08/2025

Medications

When documenting meds given via IV pump, select route "IV Pump" to access new required fields:

The screenshot shows the 'Medications Given' form. A red box highlights the following fields:

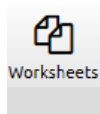

- Concentration Medication Amount: 2
- Concentration Medication Unit: gram (selected)
- Concentration Fluid Amount (in mL): 100
- VTBI: 100

Concentration: Amount, Units, Fluid (mL)

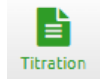

Dose: VTBI (Volume To Be Infused), Dosage, Units

Example: 2 Grams in 100 mL fluid; VTBI 100 mL

Worksheets (access via right menu)

CT32 IFT Med Safety & Timeout - Required when transferring meds to EMS IV Pump (follows CT32 protocol)

Med Titration - Complete for every titration: Time, Medication, Dose/Rate Change, Reason

Signature

Nurse - IFT IV Infusion Cross-Check

Crew - IFT IV Infusion Cross-Check

IFT IV Infusion Cross-Check – Sending facility nurse and crew member must sign when CT 32 worksheet is completed.
